- i. The detailed report on violation including its extent through multiple openings, duration of violation, name and details of persons responsible both from the State Forest Department and User Agency for violation and action against them thereof needs to be submitted.
- ii. The State Government need to assess the actual requirement and place to be utilized for approach access and same area needs to be applied for post-facto approval as per prevailing provisions under the Van (Sanrakshan Evam Samvardhan) Adhiniyam, 1980. Further, all other opening in the forest area that are not sought for diversion needs to be reclaimed by the User Agency.
- iii. The instant proposal is for approach access to mining area, hence, legal status of mining area along with approval obtained, if any, may be provided by the State Government.
- iv. From DSS, it is observed that proposed CA land overlaps with the approach road proposed for diversion. Clarification on how planting of requisite number of trees will be done in the area needs to be submitted by the State Government.
