L/M7-729/2017

dated 08.07.2020

Upgradation of Pallivasal -Aluva 66kV feeder to 220 kV level 2 Ha

1. Joint Survey / Second Joint verification is to be done.
 - a) Initially, Joint Survey is to be done with the Munnar Forest Division Surveyor and a survey sketch is to be provided for the 2 Ha Forest Land and also for the 11.2 Ha Non Forested land in Munnar Division and also in 19.2 Ha in Kothamangalam division to understand and identify the actual Land Status.
 - b) After the identification by Joint survey, Joint Verification shall be done with the respective RFO and DFO, Munnar to understand the No. Of trees to be cut, the transmission line height and any other site specific issues.
 - c) For the both of the above cases, dates shall be fixed with consultation and announced without delay.
2. The KML file uploaded in the site is two polygons for right side and left side of existing Transmission line which at many points are even below the terrain and also at certain areas. So the entire 2 Ha area or whichever is fixed after the joint survey/ joint inspection, shall be given in a polygon mode(single or segmented) to the DFO or Nodal officer, in Soft copy and in hard copy.
3. In the last field inspection, approach roads have been discussed and details have not been provided. If any approach roads are necessary, it can also be included in the Joint survey or Joint Verification stage even if it is for temporary use.
