3. The State Govt. may justify the necessity of opining this new area/mining lease for the collection of said minerals.
4. Details pertaining to land reclamation study with post mining land use plan may be provided by the state govt. to this office.

6. The undertaking may be provided by the state govt. regarding to maintain width of 10 m and 50 m strip on either side of road and natural stream respectively located inside the mining lease shall be protected but will not be considered as a part of safety zone area.
